

HARDEX RS800
Bonding Nail

- RS800 as a contact adhesive for installation of wall and floor panels.
- Most bonding application where high strength, gap filling, one component adhesive is required.
- Timber, metal, cementations' and plaster sheets to timber or metal studs.
- Installation of battens or other fixings to brick, masonry or concrete walls.
- Suitable to use on foamed polystyrene.
- Ideal for mirror backed tiles.
- Strong Bonding
- Paintable
- Non-Slump
- Styrene Safe
- Interior / Exterior Use
- Water Resistant
- Easy Clean

Color : Beige
Content : 320g/cartridge

HARDEX RS300
Acrylic Sealant (Gap Filler)

- RS300 is adheres well to wood, masonry, brick, plaster, and most siding without bleeding staining or discoloring.
- Ideal for sealing and filling cracks, gaps in window, color frames, plaster boards, cornices and interior application.
- Paintable
- Fungus & Mould Resistant
- Permanently Flexible
- Bonds & Seal
- Easy Water Clean Up

Color : Black / Teak / White
Content : 450g/cartridge

HARDEX RS900
Neutral Silicone

- RS900 is adheres to non-porous surfaces such as stone, wood, brick, concrete, marble, ceramic, automotive body, curtain wall sealing, and other general glazing.
- Ideal for indoor and outdoor construction work.
- Non-acetic
- Flexibility and Durability
- Sealing and Glazing Constructioning

Color : Black / Clear / White / Matt Black / Grey
Content : 300g /cartridge

HARDEX HA3000
All Purpose Silicone

- HA3000 is a high modulus silicone sealant that bonds to most smooth and non-porous materials.
- Multi-purpose silicone that cures in the presence of atmospheric moisture to a durable, flexible rubber which has excellent adhesion to most non-porous surface such as glass, metal, ceramic, porcelain, most plastics and painted surfaces.
- After curing, the cured silicone has good ageing resistance, high and low temperature resistance. It forms a permanent flexible rubber seal.
- Acetic Cure
- Permanently Flexible
- Bonds & Seal
- Quick Curing
- Household & Industry Use
- Joint Sealer

Color : Black / Clear / White
Content : 300g/cartridge

• **UV Adhesive 214**
(Low Viscosity)

TYPICAL APPLICATIONS:

U.V.214 has been formulated to provide very high strength bonds to glass. It is especially suited for decorative glass bonding. The low viscosity of 214 means it can wick into preassembled parts.

Appearance : Clear

Content : 250grams / bottle

Storage : Store in a cool area out of direct sunlight.

Refrigeration to 5°C gives optimum storage stability.

Origin : Italy
